

### THE MISSION

Wyboston Lakes require a website refresh to elevate the brand and showcase their premium services in an elegant and luxurious fashion.

The site will act as an effective and alluring lead generation funnel for new business enquiries with the intention of turning them into long-term clients.

As well as providing a site that informs, convinces and visually impresses, our team will also design and implement various strategies to increase the readership of the Epicure newsletter with the intention of making it the industry authority on PR related news.
